## PREFACE

At its meeting on November 5th, 1896, the Chicago Library Club voted to undertake the compilation of a union list of periodicals in the public libraries of Chicago and Evanston, and subsequently a committee was appointed to edit the work, in consultation with the Executive Committee of the Club. Eighteen libraries, which were thought to possess periodical material useful to scholars, and to be willing to make the same available for their use, were asked to furnish lists of their holdings, and all but three agreed to do so. The Committee greatly regret that the Chicago Historical Society could not, and that the Chicago Law Institute apparently did not care to, join in the work, as they recognize that the value of the compilation is appreciably lessened by the absence of the many historical and legal serials possessed by these two libraries.

The determination of the scope of the undertaking, the decision of the many questions of form and other details, and the obtaining of the first lists from the libraries, required much more time than had been anticipated, so that it was not until the spring of 1898 that the work of consolidation and revision could be begun. In the first work of consolidation the Committee had the assistance of some forty members and friends of the Club, whose names are recorded on a later page, and to whom the Club is indebted for much earnest and faithful work. In this connection it should be said that nearly all the work done by the Committee and its assistants has been done by busy people outside of their regular working hours.

An examination of the results of the first consolidation showed such marked differences in method and style of the entries from the larger libraries that it was evident that the revision, to be at all satisfactory, must be done by one hand. This work was undertaken by the Chairman of the Committee, and was carried on as rapidly as his health and the many difficulties permitted. In all nearly 2,000 entries were referred back to the libraries for correction or additional information, but so many discrepancies and errors must still exist that it is only just that the Committee should be relieved from the responsibility for them.

In January, 1900, copy was sent to the printer, and later the second proof to the libraries for corrections and additions. The latter proved to be so many that eventually the list was brought down to the close of 1900. The proof-reading on the first galley proof was done by the Committee in sections, that on the second by the libraries themselves and on the subsequent proofs by the Chairman. The Club is indebted to Miss Mary E. Hawley for corrections on the Spanish titles, to Mr. J. A. Meislisch for the revision of the Russian titles and to Mr. A. G. S. Josephson for that of the Scandinavian titles.

The list is intended to include all serials not of a purely administrative character in the co-operating libraries, provided a library has (1) five volumes or five years in sequence; (2) one-half the set if less than ten volumes or years; (3) the first or last volume of the set. The third class was included in order

to record the beginning or end of sets not often met with, as it was thought that this information might be of bibliographical interest. Exact statement of incomplete sets is given only when no library possesses a complete set.

The Committee have had some difficulty in applying the rule of excluding annual reports of a purely administrative character, and they have intentionally interpreted the rule very liberally in dealing with the publications of the State of Illinois, the City of Chicago and the local societies.

The form and method of entry have been determined by the practice of the Boston Public Library in the compilation of its "List of Periodicals, Newspapers, Transactions, and other Serial Publications currently received in the Principal Libraries of Boston and Vicinity," issued in 1897. The Committee are under obligations to the Boston Public Library for advance copies of this list which were used as a basis for the work. The rule there adopted of entering American and English journals published by a society but having a specific title, under the title with reference from the name of the society, has been quite consistently carried out, but the other rule of entering all publications of foreign societies under the name of the society has not been so well observed, as, indeed, it was not in the Boston list. In some cases where the error was afterwards discovered reference has been made from the society to the specific title. In all cases, whether American or foreign, reference has been made from the place of location of a society to its name, so that it is hoped that no serials will be overlooked through inconsistency of entry if these references are borne in mind.

A count of every fifth page of the list has given some figures which may be of interest. According to this determination there are in the whole list the titles of some 6640 serials and 1470 references, counting all the references from a single entry, such as a city, as one. Of these serials 3,755, or 57 per cent., are currently received in at least one library, and 2,860, or 36 per cent., are in other languages than English. The unusually distinctive character of the larger libraries of the city is shown by the comparatively small amount of duplication: as many as 4,310, or 65 per cent., are to be found in only one library; 1,175, or 18 per cent., are in two libraries; 580, or 9 per cent., are in three; while only 550, or 8 per cent., are in four or more.

The Committee would acknowledge with thanks the attention given to the work by the printers, Messrs. W. P. Dunn Co., whose careful composition and proofreading have materially lessened the work of editing. While the use of the linotype is responsible for some imperfections of form, it is certain that in no other way could so complicated a piece of work have been accomplished within the means of the Club.

The Committee hope that the list, in spite of its many defects and errors, may prove of real service to the scholars using the public libraries of Chicago, and they take pleasure in announcing that, if this expectation is realized, The John Crerar Library proposes to issue an annual cumulative supplement, which by keeping the list up to date will prevent it from being made worthless by the ever increasing additions to the stores of books in the city. Corrections of material errors in the main list will be made in these supplements, and notice of such errors will be gratefully received by The John Crerar Library.

CHICAGO, August, 1901.
